OnSSI's Ocularis 5 VMS Now Integrated with Spectra Logic's Verde NAS Storage Platform

Provides a High Performance, Reliable and Affordable Long Term IP Video Retention

Spectra Verde NAS   *Ocularis 5*

Pearl River, NY (September 16, 2015) – OnSSI and Spectra Logic have formed a technology partnership designed to deliver the advanced performance and functionality of OnSSI's Ocularis 5 Video Management System (VMS) combined with Spectra Logic's Spectra Verde Network Attached Storage (NAS) platform. The combined solution delivers industry-leading VMS and storage technology providing long term retention of video surveillance data at an affordable price point for end users.

"The integration of OnSSI's recently released Ocularis 5 and Spectra Logic's versatile Verde NAS storage platform provides a cost-effective solution for recording, retaining and retrieving vast amounts of video for fast and easy search and playback," said Ken LaMarca, VP of Sales and Marketing, OnSSI. "This combination of best-in-breed

technologies allows users to deploy a highly secure and reliable video storage solution with the highest levels of performance and value."

"We are pleased with our technology partnership with OnSSI, combining their industry-leading Ocularis 5 VMS with our innovative Verde NAS storage platform," said Ray Heineman, SVP Business Development, Spectra Logic. "Ocularis and Verde NAS combine to deliver a highly functional and seamless video management and storage appliance at an extremely attractive price point. In our integration demonstration, we showed that Verde can easily manage OnSSI environments with more than 500 1.2 megapixel cameras, with each running at 30 fps."

Engineered for reliability and integrity, Verde NAS utilizes Spectra Logic's unique implementation of ZFS software-based RAID combined with the latest disk technology to bring new life to long-term high-density bulk storage. Verde NAS is designed for ease of deployment, operation, management and expandability in a small footprint that is available in 2U and 4U models. Additionally, Verde NAS helps to ensure maximum data security by utilizing multiple layers of protection and redundancy.

Ocularis 5 is a full featured VMS with PSIM functionality including centralized management of physical security and content analytics to deliver a truly integrated platform with enhanced recording and camera management. It features automatic load balancing for managing recordings across system servers, which yields a significant increase in system performance, all while reducing storage costs. Ocularis 5 also allows for multiple recorders to be combined under the same Base (including legacy Ocularis 4.X recorders) with centralized user and event management.

Ocularis is offered in three models: Professional, designed for organizations operating multiple locations with small to mid-sized camera counts; Enterprise, built for a wide range of mid to large IT-centric organizations; and Ultimate, created for large organizations with extended command and control needs and recording server failover.

OnSSI and Spectra Logic are currently working on interoperability testing for Spectra Logic's entire Verde product line.

About OnSSI
On-Net Surveillance Systems, Inc. (OnSSI) was founded in 2002 with the goal of developing comprehensive and intelligent IP video surveillance management software. OnSSI's Ocularis IP security and surveillance VMS platform increases security, reduces operational costs, and helps organizations move closer to prevention. Ocularis delivers open architecture, flexibility, and scalability for a range of applications including education, gaming, government, healthcare, manufacturing, public safety, transportation, and utilities. OnSSI is headquartered in Pearl River, New York and has representation in over 100 countries. With its acquisition of Germany-based VMS company, SeeTec AG and the launch of Ocularis 5, OnSSI continues to drive global expansion and technological innovations.

About Spectra Logic
Spectra Logic develops deep storage solutions that solve the problem of long term storage for business and technology professionals dealing with exponential data growth. Dedicated solely to storage innovation for more than 35 years, Spectra Logic's uncompromising product and customer focus is proven by the largest information users in multiple vertical markets globally. Spectra enables affordable, multi-decade data storage and access by creating new methods of managing information in all forms of deep storage—including archive, backup, cold storage, cloud and private cloud.
